

Say You Want a Revolution

New from Willie & Max (Booth 732) is its Revolution Series of saddlebags available in eight leather or 12 synthetic models in either hard mount or throwover styles. The hard mount system, which includes hardware and adjustable brackets, is incorporated into the bag. The throwovers feature reinforced backs for better stability. Powdercoated wire frames help the bags maintain their shape. The Revolution line also includes a tour pack/trunk bag, handlebar bag, fork bag and windshield bag.

Available through distributors. Contact: Willie & Max Saddlebags, 847-356-7763, www.buywillieandmax.com.

Air Supply

Customers looking to replace their stock Harley FL Low Profile touring shocks can install Independent Cycle's (Booth 1436) L7 Series Air Suspension. Available in black and chrome for 2006-2008 models, the L7 features deflective disc dampening to reportedly offer smooth riding without the unwanted pogo action. The suspension installs in the stock location with no modifications and includes a black handlebar-mounted control, an on-board air compressor, solenoid valve and all the necessary hardware. Color-coded plug-and-play wiring allows for easier installation.

Let Your Sportster Breathe

K&N Engineering's (Booth 1041) oversized custom intake assembly for Sportsters is designed around one of the company's High-Flow air filter to optimize airflow and reportedly increase performance. The assembly includes a powder-coated, billet aluminum backing plate, internal-run breathers and a built-in, dyno-tuned velocity stack. No rejetting or fuel management changes are required for the assembly, which fits behind the stock air cleaner cover.

Available through distributors.
